

**HAVWOODS**  
INTERNATIONAL

## OUR COMMITMENT TO THE VALUES OF SUSTAINABLE CERTIFICATION

Conservation of the environment is one of **Havwoods Global Holdings Ltd** (trading as Havwoods International) main concerns; we understand that this also allows us to offer a more complete service to our clients and to reconcile our business development with respect for our surroundings.

We are continually setting up environment protection measures. This leads us to try to achieve optimum quality with maximum respect for the environment by developing a series of really effective measures, in all areas of the company.

In order to improve its management, **Havwoods International** has taken measures in line with the FSC® Chain of Custody requirements. All employees have been informed of our commitment, and the management team continue to make significant investments to adapt the facilities. But this commitment is not limited to internal production processes, it also extends to raw materials, using those that have less impact on the place of origin, that are recyclable and safe for the environment (they do not contain contaminants and they have an environmentally-friendly composition).

In this sense, **Havwoods International** has concentrated its efforts on the definition and documentation of a Chain of Custody Management System in accordance with the requirements of The Forest Stewardship Council®.

The certification of the chain of custody implies the evaluation of the forestry production line, from the tree to the end product, including all the processing, transformation and distribution stages, to verify that the wood used comes from a well-managed forest. Due to which **Havwoods International** keeps its commitment to implement and maintain the chain of custody requirements in accordance with certification requirements.

The mark of  
responsible forestry

With the implementation of the Chain of Custody System, **Havwoods International** maintain the effort to guarantee that its range of wood floor comes from well-managed, certified forestry operations, where ecological, social and responsible forest management values are observed.

Havwoods International's commitment to sustainable certification values does not stop there. Our values, as determined above, also adhere to the policies and requirements according to PEFC™ and, as with the above certification, we are also fully affiliated and adhere to the requirements of the Programme for the Endorsement of Forest Certification™.

Havwoods International has set out as a priority not to purchase raw materials from illegal felling or conflictive sources, due to which it will demand the necessary requirements from its suppliers to guarantee timber production contains no illegal timber or has been party to any illicit activities.

After everything achieved so far, we continue working convinced that respect for the environment is and will be one of the development vectors inherent in our activity, now and in the future.
