

# Introducing MAGNA<sup>®</sup>

Magnetic floor for the  
workspace environment

The latest innovation in raised-access flooring, Magna's magnetic fits system offers a versatile solution for installation in multi-purpose commercial premises, providing accessibility to underfloor services that cannot otherwise be installed in wall cavities. Magna's magnetised and foam-sealed wood boards provide a secure connection to the supporting structural pedestals, which can be conveniently disconnected using a suction lifter to allow for maintenance and repair of the concealed services. In comparison to conventional fit methods, Havwoods Magna is up to 90% faster to install making it ideal for large-scale office and retail environments where a quick turnaround is essential. The Magna magnetic system is offered across the majority of our wood floor finishes, creating flexible floor coverings that cater to both aesthetic and practical specifications. We're also proud to offer a Lifetime Guarantee on Magna's magnetic components to provide durability and complete peace of mind.

# 90%

faster to install

Raised-access flooring

Easy access to  
underfloor services

Lifetime Guarantee
